

F E A T U R E S

The Add-A-Stack® 2512 valve is a multi-function valve designed to control both cylinders and motors for light and medium duty truck applications. Combining both inexpensive low and high flow sections into one valve.

Input flows to 30 GPM

-Adaptable to both light and medium duty applications

Operating pressures to 3500 PSI

Five different valve operators available

-Valve can be controlled by, cable, electric on/off, electroproportional, pneumatic and hydraulic piloted remote

Simultaneous valve operation

-Innovative hydraulic circuit ensure simultaneous valve operations

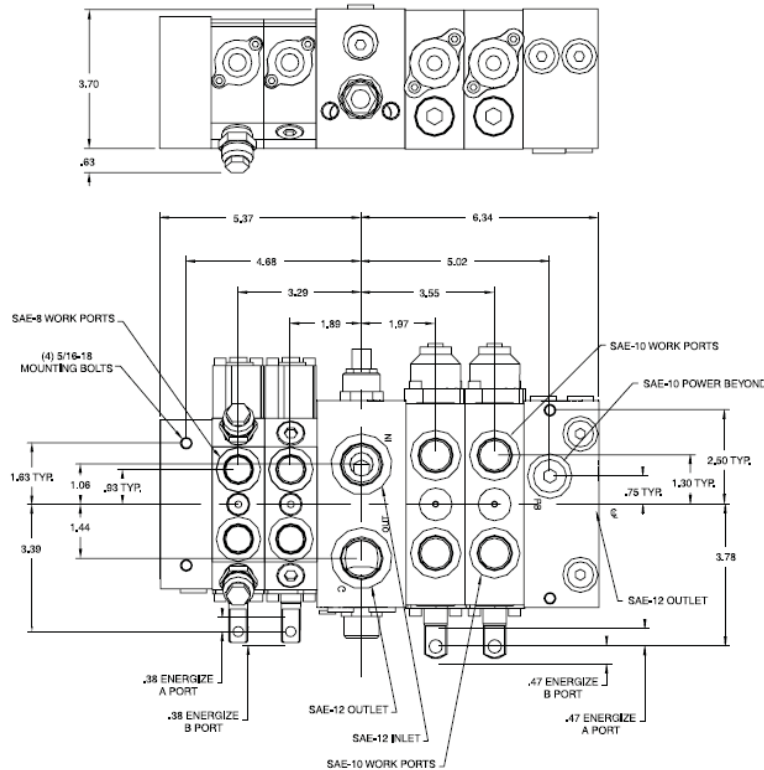

High flow and low flow sections in one valve stack

-Precisely control all functions with valve sections sized for each section

Level ports all exit on the bottom side to accomodate enclosures

Installation Information

Specifications

Valve Specifications

Nominal Inlet flow rating.....30 gpm*
 Operating Pressure (maximum).....3500 psi
 Tank Pressure (maximum).....300 psi
 Temperature Range.....-20° F to +180° F
 Fluid requirements.....petroleum based 50-2000 ssu
 Filtration Requirements.....ISO 4406 18/14
 Seals.....BUNA-N
 Mounting sensitivity.....none

Electrical Specifications

Rated Voltage.....12 VDC
 Coil resistance (at 68°).....4.7 ohms
 Current.....1.5 amps
 Power.....18 watts
 Duty cycle.....100%
 Frequency.....50 Hz pwm
 Electric connector.....Packard connector

Complete the control solution with the VT15 or VT25 Valve/Tank assembly

The VT15 Valve/Tank assembly combines the valve enclosure, tank and all components under one east to remove rubber latched cover.
