

# CUSTOM HYDRAULIC HOSE KIT ASSEMBLIES

POWERED  
BY  
**FORCE**  
America<sup>®</sup> Inc.

# FORCE America Custom Production Assembly and Kits for Hoses, Fittings and Adapters

We save you time and money by completing sub-assemblies, grouping multiple products, and delivering them to you in one complete shipment... ready for installation!

## Inventory and Selection

It begins with our vast and complete inventory of components that are in stock and ready to build your custom order. This saves you time and greatly reduces your need to carry inventory.

We stock over 22 different types of hose, from general purpose to ultra high pressure hose and everything in between. When it comes to fittings and adapters, we have an inventory of thousands of the types you need, when you need them.

## Computerized Precision

When it comes to hose length, it needs to be exact. We have the latest in computerized hose cutting equipment that measures and cuts a length of hose to within 1/16 of an inch of your specification. This allows you to receive the correct hose length every time. Fittings are attached using the most modern and accurate equipment available. No more poor fits or leaks!

## When We Say Custom, We Mean Custom!

At our production facility in Fort Dodge, IA, we have the capability to produce computerized custom printed hoses. This saves you time and money! On each hose, we can print your: part number, company name, phone number, or anything you would like, in a repeating pattern for the length of each hose.

---

## Built to Your Specifications

Each hose/fitting/adaptor kit is made, labeled and packaged to your specifications. Whether it's hose groupings, individual components, or complete sub-assemblies that are ready to install, we will build to your specifications.

---

## Why Trust Your Equipment and Your Business to Us?

Here is what a few of our customers have said...

"We have worked with FORCE America for almost 20 years. They provide an excellent product at a great price, are always a phone call away if there's a problem, and perhaps more important, they've acted as a true partner on many of our R&D projects. The word "partner" really sums it up for us. We truly think of them in that way, rather than as just a traditional vendor."

J.W., Owner  
Manufacturing Company

"We buy from FORCE America because of the people behind the products. The people in their Illinois branch are experts in the application of their products and are always willing to go out of their way to be helpful and informative. Whether dealing with matters of price, availability or engineering, they are always working on our behalf to promote the smooth and efficient operation of our business interests. FORCE America is a true asset to our business."

P.B., Owner  
Truck Equipment Company
