**PowerMAX™**  
TIE-ROD Hydraulic Cylinders

From Agriculture to Automotive and every industry in between, PowerMAX™ hydraulic cylinders are designed and manufactured to meet the most demanding requirements. The PowerMAX™ line was developed because we understand the need for professional performance and durability. All PowerMAX™ cylinders are hydraulically tested at twice their working pressure.

- Chromed, polished and individually heat-treated shaft provides extended cylinder life.
- Working pressure 2500 PSI and 3000 PSI.
- Ductile iron rod clevis and blind end clevis.
- Precision honed steel tubing for extended life.
- USA specified seals to ensure positive sealing.
- All cylinders are 100% hydraulically tested up to twice the rated working pressures.
- Series PML – 2500 PSI working pressure (5000 PSI proof pressure).
- Series PMH – 3000 PSI working pressure (6000 PSI proof pressure).
- Heavy-duty high-tensile tie rods prevent failure at high loads.
- Available in wide range of standard and ASAE type sizes.
