

**F E A T U R E S**

SCE Spin-A-Veyer™ valves are a compact and economical electro-proportional control valve designed specifically for spreader applications. These valves are compatible with most electronic spreader controllers and provide independent control of both auger, spinner, and output flows.

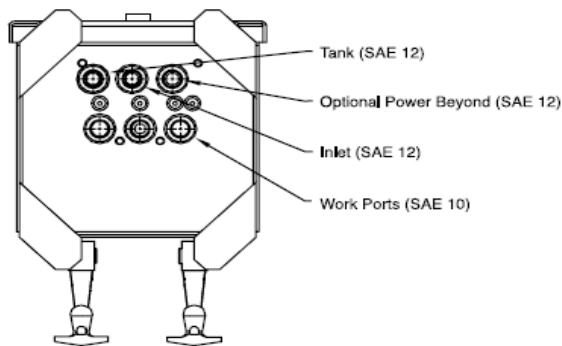

- **Pressures to 3,500 PSI**  
-Capable of operating the most demanding spreader applications
- **Pressure compensated flows to 22 GPM**  
-Accommodates most popular spreaders, including tailgate and V-box
- **Unparalleled meterability**  
-Operator achieves precise and repeatable material distribution
- **High flow relief**  
-Can serve as main relief in central hydraulic system
- **Adaptable to gear pump or load-sensing systems**  
-Accommodates open or closed center circuits
- **Integrated power beyond**  
-Provides spreader priority when plumbed before main control valve, (when applicable)
- **Hardened cartridge bores and spools**  
-Increased service life and greater
- **Manual override standard**

## Installation Information

All dimensions are approximate.

## Specifications

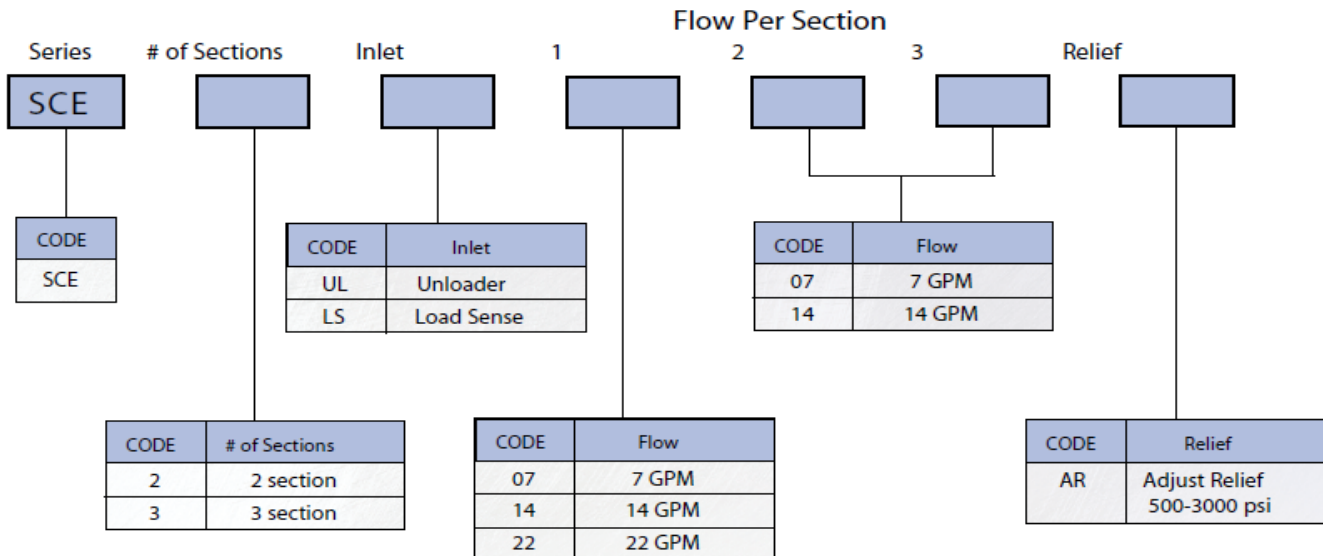

### Valve Specifications

- Nominal Inlet flow rating.....35 gpm
- Operating Pressure (maximum).....3500 psi
- Temperature Range.....-20°F to +180°F
- Fluid requirements.....petroleum
- Filtration Requirements.....ISO 4406 18/14
- Seals.....BUNA-N
- Mounting sensitivity.....none

### Electrical Specifications

- Rated Voltage.....12 VDC
- Coil resistance (at 68°).....4.7 ohms
- Maximum current rating.....1.5 amps
- Watts.....18 watts
- Duty cycle.....100%
- Frequency.....50 Hz pwm
- Electric connector.....Packard connector

## Ordering Information

501 East Cliff Road  
Burnsville, Minnesota 55337
