

Tank Tamers in
Application Tank

FOR IMMEDIATE RELEASE:

VARITECH INDUSTRIES LAUNCHES TANK TAMERS

ALEXANDRIA, MINNESOTA, November 29, 2011 – VariTech Industries introduces a major advancement in the safety of transporting liquids over the road...TANK TAMERS.

TANK TAMERS are 15-inch, polyethylene baffling balls that, when inserted into a liquid tanker, will virtually eliminate the liquid surge that results when a vehicle starts, stops, or corners. TANK TAMERS are compatible with a variety of liquids, with the exception of dairy and petroleum-based products, and only consume 1.5% of the tank's overall holding capacity.

"Over the road truckers and firefighters are aware of the potential hazards of liquid surge associated with transporting liquid loads. We are pleased to introduce TANK TAMERS as a helpful solution to this sometimes dangerous situation," said Benjie Schoenrock, Product Manager, VariTech Industries.

"Made of high-density polyethylene with no ferrous inserts, TANK TAMERS are heavy duty, yet lightweight. With no metal components that could corrode or break, the concern over load contamination that can cause pump and plumbing failure is eliminated. TANK TAMERS' quick and easy assembly makes retro-fitting a tanker an easy task," adds Schoenrock.

VariTech Industries is a subsidiary of FORCE America, Inc.

About FORCE America, Inc.

With over 50 years experience, FORCE America manufactures and distributes products that meet the needs of mobile, on-off highway markets. Our products are backed by technical support and application know-how for the most demanding applications.

FORCE America, Inc. is comprised of:

FORCE America Manufacturing and Distribution

www.forceamerica.com

Manufacturer and supplier of mobile hydraulic systems, electronic controls and components.

VariTech Industries

www.varitech-industries.com

Manufacturer of automatic salt-brine production, liquid storage, transfer and mobile application systems.

PreCise MRM

www.precisemrm.com

Manufacturer of Mobile Resource Management hardware and software solutions targeted at severe duty applications.

Markets:	Agricultural Equipment	OEM Agricultural Equipment
	Commercial Fleets	OEM On-Off Highway Equipment
	Lawn and Landscape Equipment	Snow Removal Contractors
	Light, Medium and Heavy Duty Trucks	Spreader Plow Trucks
